

Privacy Policy for Ypsilon Remote Control

Effective Date: May 19, 2026

Ypsilon Remote Control ("the App") is developed by Ypsilon Electronics O.E..

This Privacy Policy explains our approach to your privacy.

1. No Data Collection

The App does not collect, store, transmit, or share any personal information or user data. We have no servers and no analytics.

2. No User Accounts

The App does not require you to create an account, sign in, or provide any personal information to use its features.

3. Local Network Communication and Device Discovery

The App is designed to discover and communicate with the Ypsilon S100 Streamer on your local network. To do this, the App performs device discovery on the local network and exchanges commands directly with the device (device-to-device communication).

All communication takes place entirely within your local network. No information about your network, your device, or your usage is sent to us or to any third party. Your device's operating system (iOS or Android) may ask for your permission to access the local network the first time the App is used, as required by the operating system.

4. Local Storage

The App may store your preferences (such as app settings) locally on your device. This information remains on your device, is not transmitted anywhere, and can be removed at any time by deleting the App.

5. Third-Party Services and SDKs

The App does not use any third-party services or SDKs that collect, transmit, or share user data. The App does not use analytics, advertising networks, or tracking technologies.

6. External Links and Local Web Interface

The App may open your device's browser to access a local web interface hosted by the Ypsilon S100 Streamer on your local network (for example, to upload a firmware update file to the device). This connection stays entirely within your local network and no data is sent to us or to any third party.

7. Children's Privacy

Because we do not collect any data, we do not knowingly collect information from children of any age.

8. Changes to This Policy

We may update this Privacy Policy from time to time. Updates will be posted at this URL with a revised effective date.

9. Contact
